

Company Profile

“Illuminate your environment with LED lights of impeccable style”

Ecolux facilitates the diverse lighting needs of people by offering an enormous array of LED luminaries. The LED lights of the company are designed specifically to meet the high standards of architectural quality and we have multiple options for both outdoors or indoors as well as Industries. The quality of our LED lights is equally matched by our commitment of maintaining exceptional customer service.

Ecolux was founded in 2012 with the goal to present new possibilities of illumination for houses, apartments, offices, commercial establishments, Industries, etc. Our commitment to quality and tireless efforts has taken our company to new heights beyond our wildest imaginations. Today, we have more than hundred employees with twelve qualified people leading our responsibilities of research & development. Also, our manufacturing facility covers a massive 25,000 sq. ft area which helps the functions of our five separate production lines in use.

As a company situated in India, with Make in India initiative of Govt., Ecolux is dedicated to serving the unique interests of Indians with numerous, intuitively developed LED lighting options. Our commitment to quality and uncompromising service standards have also helped us earn ISO 9001-2000 certification of quality.

Vision of Ecolux

Our vision is to be an ultra-modern enterprise that delivers LED lights as per the needs of our clients at a faster pace. Thus, we have been able to deliver high-quality LED lights consistently for many years with a reputation for faster delivery of High quality products. Also, we have been commended for our efforts to develop new designs that earn the love and respect of our clients.

Our emphasis on customization and adherence to modularization make our facility a workshop for dreamers. Our multi-faceted approach to manufacturing LED lights gives us the opportunity to deliver high-affordable lights with unmatched quality.

Research & Development

“Quality is the cornerstone of our R & D”

Our team of Research & Development has helped us to reach the place we are now through constant innovation and consistent improvements. Our R & D efforts are intended to make our company the epitome of quality. Also, we combine our tireless efforts with our elaborate 25 years of experience in the fields of Electronics, Product Design, Industrial Design, Quality Management system and so on. To deliver LED lights that exceed your expectations we have a decade-long experience in developing the most.

So, when you take the decision to choose one or more of our products, you will also be making the choice to uphold quality, experience, and appeal for your indoor and outdoor necessities.

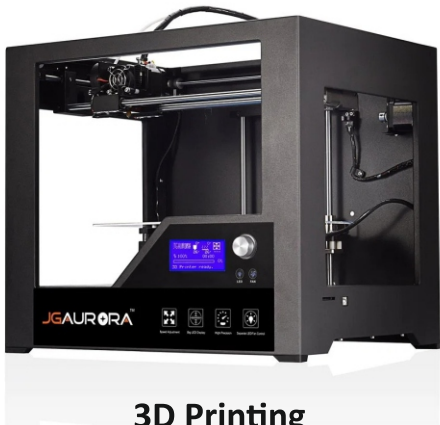

Manufacturing & Innovation Center

“We bridge the gap between the designs you love and the quality you deserve”

We are gifted with a team of dedicated and highly-talented individuals that have a colorful experience in the industry. Thus, they play a major role in keeping our drive for innovation alive, helping our organization to work and grow together as a team.

Also, we keep constant tabs on technological advancements, so that we can always stay one step ahead of the necessities and interests of our clients. Our manufacturing and designing segments are retrofitted with cutting-edge tools and software systems, time and time again. So, from the time of our founding, our LED lights have always been a symbol of quality and endearment.

Designs of Ecolux exhibit stellar quality and precision, and our design facility embraces the most advanced tools and techniques to aid effective measurement, simulation, and validation. In this way, our new designs are analyzed and authenticated stringently in terms of accuracy, safety, and overall quality. So, when a product leaves our facility after passing through our rigorous testing measures, it is bound to be immaculate. Also, we bring swiftness and quality together with our 3-D Printing facility that is situated in-house, thereby fulfilling customer expectations with unmatched speed.
